DID YOU KNOW?

The benefits provided under the plan can be claimed in the zone where the **main destination country** is located as well as **in the lower zones**. In other zones, cover is limited to **accidents and medical emergencies**.

FOR EXAMPLE:

If you have chosen the United States (zone 0) as the main destination country, you are covered all year round in zone 0 and in all the lower-level zones listed above for unforeseen and scheduled medical care.

 **PLEASE NOTE:**

When calculating the price, it's important to specify the country or countries where you want to receive your care.

FOR EXAMPLE:

If you have chosen Thailand (zone 3) as the main destination country and plan to receive medical care in Singapore (zone 1), you should select Singapore under Cover Extension/Other Countries. Medical care will then be covered in zones 1 and 3.

You can select up to a maximum of **10 extension countries**. Cover will then be extended to the zone in which these countries are located. They will be listed on the insurance certificate.
